

# Health Travel Network Event

Manama – Bahrain

Supported by

Kingdom of Bahrain مملكة البحرين

Ministry of Culture وزارة الثقافة

## Supported by

Saleem Telemedicine WLL is the first company to truly enable a border-crossing health experience. Saleem is developed in and for the Gulf Council Countries and is endorsed by the National Healthcare Authority of the kingdom of Bahrain.

The Clinic Bel Etage is the largest private clinic in Düsseldorf and, with its experts in the fields of spinal surgery, orthopedics, ENT, plastic surgery and alternative medicine, offers all options of outpatient and inpatient care on more than 4,000 square meters. Innovative procedures such as disc prosthetics and minimally invasive hip replacements are performed in four high-end operating rooms. A Center of Balance rounds out the individual therapy plan for patients.

The Hirslanden Private Hospital Group is synonymous with quality and excellence. For over 25 years we have enjoyed an outstanding reputation as one of the leading private healthcare providers worldwide. As the largest private hospital group in Switzerland, we cover a huge variety of specialist disciplines and deliver the highest standards in medicine and care.

## Health Travel Network Event in Bahrain

Location	Date	Time
<u>Al-Khalifiyah Library</u> Sheikh Hamad Avenue 727 Manama Kingdom of Bahrain	11 January 2022	09:00 – 15:00

**Digitalization is revolutionizing the health sector in the GCC Countries, but it requires an immense rethinking among all players.**

Healthcare stakeholders from the region will be in the center of this network event. In addition, the opening of a Caresocius subsidiary (Saleem Telemedicine WLL) in Bahrain will be announced. The product will be presented and the added value of being a member will be explained. Stakeholders will be able to exchange ideas about international healthcare.

The situation on the ground will be discussed, with suggestions for improvement, in order to identify opportunities and to fully exploit the potential to position the kingdom of Bahrain, facilitating an export of medical services.

Starting from a human-centered perspective, the goal of this event is to foster an exchange to provide an overview of the technical, cultural, organizational and economic changes happening in patient care.

For Caresocius, this includes not only the new models of thinking and technological innovations, but also the social factors that can positively and sustainably influence the way we deal with health in tomorrow's digital society.

Caresocius is shaping the digital transformation in cross-border healthcare, medical prevention and treatment in such a way that all parties involved are in a win-win situation through synergy effects.

**Moderator**  
Dr. Eberhard Scheuer  
President dHealth Foundation
